

GEOMETRICAL ISOMERISM ASSIGNMENT

40 QUESTIONS | COUNT GEOMETRICAL ISOMERISM ONLY

Q1. Possible geometrical isomers = ____.

Q2. Number of compounds showing geometrical isomerism = ____.

Q3. Total number of geometrical isomers of the given compound is ____.

Q4. How many geometrical isomers are possible for the following compound?

GEOMETRICAL ISOMERISM ASSIGNMENT

40 QUESTIONS | COUNT GEOMETRICAL ISOMERISM ONLY

Q5. How many geometrical isomers are possible for the following?

Q6. Among the following, how many compounds can show geometrical isomerism?

,

,

,

GEOMETRICAL ISOMERISM ASSIGNMENT

40 QUESTIONS | COUNT GEOMETRICAL ISOMERISM ONLY

Q7. Consider the following compounds and write the number of compounds which can show geometrical isomerism.

Q8. For each of the following compounds, state whether it can show geometrical isomerism or not.

GEOMETRICAL ISOMERISM ASSIGNMENT

40 QUESTIONS | COUNT GEOMETRICAL ISOMERISM ONLY

Q8. How many of the following can show geometrical isomerism?

Q9. How many geometrical isomers are possible for the following?

GEOMETRICAL ISOMERISM ASSIGNMENT
40 QUESTIONS | COUNT GEOMETRICAL ISOMERISM ONLY

Q10. How many of the following compounds will show G.I.?

Q11. Number of geometrical isomers of the compound is ____.

Q12. How many geometrical isomers are possible for the following?

Q13. For structures (I) and (II), let X and Y be their respective total numbers of geometrical isomers. Find (X - Y).

GEOMETRICAL ISOMERISM ASSIGNMENT

40 QUESTIONS | COUNT GEOMETRICAL ISOMERISM ONLY

Q14. Total number of geometrical isomers of the following compound = ____.

Q15. How many compound(s) can show G.I.?

Q16. Using the cyclic structures shown below, identify the total number of structures which can show geometrical isomerism.

Q17. How many of the following are cis-dichlorocyclohexane?

Q18. Total number of compounds which, on dichlorination, give only 3 structural isomers (the mechanism may differ and even low-yield products are to be counted) = ____.

GEOMETRICAL ISOMERISM ASSIGNMENT

40 QUESTIONS | COUNT GEOMETRICAL ISOMERISM ONLY

Q19. Total number of geometrical isomers of the following compound = ____.

Q20. For the following, p and q are the total numbers of geometrical isomers in parts (i) and (ii), respectively. Find p + q.

(i) Total number of geometrical isomers of the given structure is p.

(ii) Total number of geometrical isomers of

is q.

What is the sum of n + q ?

Q21. Number of geometrical isomers for the following compound = ____.

Q22. Which of the following unsaturated hydrocarbons have hyperconjugative hydrogens and also show geometrical isomerism?

Q23. Number of G.I. of the given compound = ____.

GEOMETRICAL ISOMERISM ASSIGNMENT

40 QUESTIONS | COUNT GEOMETRICAL ISOMERISM ONLY

Q24. Total number of geometrical isomers in the given compound = ____.

Q25. In the given compounds, how many have Z configuration along the double bond?

(i)		(ii)	
(iii)		(iv)	

Q26. How many geometrical isomers are possible for the following compound?

Q27. How many geometrical isomers are possible for the following compound?

Q28. How many geometrical isomers are possible for the following compound?

Q29. How many geometrical isomers are possible for the following compound?

Q30. How many geometrical isomers are possible for the following compound?

Q31. How many geometrical isomers are possible for the following compound?

Q32. How many geometrical isomers are possible for the following compound?

Q33. How many geometrical isomers are possible for the following compound?

GEOMETRICAL ISOMERISM ASSIGNMENT

40 QUESTIONS | COUNT GEOMETRICAL ISOMERISM ONLY

Q34. How many geometrical isomers are possible for the following compound?

Q35. How many geometrical isomers are possible for the following compound?

Q36. How many geometrical isomers are possible for the following compound?

Q37. How many geometrical isomers are possible for the following compound?

Q38. How many geometrical isomers are possible for the following compound?

Q39. How many geometrical isomers are possible for the following compound?

Q40. How many geometrical isomers are possible for the following compound?

ANSWER KEY

Q1	5	Q11	16	Q21	4	Q31	4
Q2	6	Q12	2	Q22	3	Q32	32
Q3	4	Q13	6	Q23	6	Q33	8
Q4	5	Q14	4	Q24	1	Q34	32
Q5	7	Q15	5	Q25	3	Q35	6
Q6	3	Q16	5	Q26	4	Q36	3
Q7	5	Q17	2	Q27	6	Q37	4
Q8	6	Q18	32	Q28	8	Q38	6
Q9	3	Q19	8	Q29	8	Q39	16
Q10	5	Q20	4	Q30	4	Q40	8

Geometrical isomerism only; optical isomerism is excluded unless explicitly indicated in a question.
